Manne Nihar Goel

Senior Angular / Full-Stack Developer | ERP & SaaS Platforms | Angular · Node.js · .NET · AWS · Docker
Hyderabad, India · +91 8008112984 · nihar.goel4@gmail.com · linkedin.com/in/nihar-goel-33819882

PROFESSIONAL SUMMARY

8+ years building web applications, from responsive Angular UIs to full-stack enterprise platforms. Currently architecting OneSphere, a multi-tenant ERP at Kapil Group, built with Angular, NgRx and Native Federation micro frontends on Node.js, .NET and PostgreSQL. Hands-on with Docker, AWS (S3, CloudFront, API Gateway), MinIO and GitHub Actions CI/CD. Built an AI-powered support automation system on a locally hosted LLM. Delivered 7+ products across e-learning, healthcare, logistics, e-commerce and on-demand services.

TECHNICAL SKILLS

Frontend	Angular (2+ through latest), AngularJS, TypeScript, JavaScript, RxJS, NgRx, Native Federation (Micro Frontends), HTML5, CSS3, SCSS, Bootstrap, Angular Material, PrimeNG, jQuery
Backend	Node.js, Express.js, .NET, REST APIs, WebSockets, event-driven updates
Database	PostgreSQL, MySQL, MongoDB
AI & Automation	Local LLM integration, message classification, automated email/WhatsApp replies, workflow automation
Cloud & DevOps	AWS (S3, CloudFront, API Gateway – working knowledge), Docker, MinIO, GitHub Actions (CI/CD), Git, GitHub
Architecture	Multi-tenant SaaS, Micro Frontends, modular ERP design
Testing & Tools	Unit testing, application testing, Visual Studio, VS Code, draw.io, Archify

WORK EXPERIENCE

Developer & ERP Architect — Kapil IT Solutions (Kapil Group), Hyderabad
Mar 2021 – Present

- Architected OneSphere, a multi-tenant Angular ERP platform covering Accounts, HRMS and Inventory, with schema-per-tenant isolation and row-level security in PostgreSQL, and config-driven onboarding of new clients without code changes.
- Built an AI support-ticket automation system on a locally hosted small LLM that reads client emails and WhatsApp group messages, separates real issues from general messages, auto-creates tickets and replies to the client; when a developer marks a ticket Done on the Scrumban board, the client is emailed automatically.
- Led migration of the frontend to Micro Frontends with Angular Native Federation, so 3 modules build and deploy independently.
- Designed NgRx state management across 3 business modules (Accounts, HRMS, Inventory).
- Built REST APIs in Node.js/Express and .NET, and worked with AWS API Gateway to expose and manage them.
- Containerized frontend and backend applications with Docker for consistent builds across development, staging and production.
- Integrated MinIO object storage for local/on-premise servers and Amazon S3 for live environments, with CloudFront for cached content delivery.
- Set up GitHub Actions CI/CD pipelines to automate build, test and deployment.
- Implemented WebSockets for real-time payment transaction updates and user notifications.
- Built event handlers that automatically update dependent tables when source records change, keeping data consistent across modules.
- Documented end-to-end project flows in Archify and draw.io, mapping which database tables each change affects, to simplify onboarding and impact analysis.
- Built Kapil Guru, an online learning platform, from scratch in Angular 12: trainer and student dashboards, course and batch management, video uploads, live classes and Paytm payments.
- Mentored 5 developers and ran code reviews for the frontend team.

UI Angular Developer — Versatile Mobitech Pvt Ltd
Jun 2020 – Jan 2021

- Built the admin dashboard for Mr. & Ms. Beauty, an on-demand beauty services platform, in Angular 10 and Angular Material.
- Developed the admin UI for Load Miles, a trucking logistics platform with GPS load tracking, notifications and load-cost analytics.
- Worked with the UX team on requirements and integrated Node.js/Express REST APIs.

UI Angular Developer — Prodesign Technologies India Pvt Ltd
May 2019 – Jan 2020

- Developed the admin console for Vortex, a doctor-consultation app with chat, video/audio calls and health-report uploads (Angular 7, Angular Material).
- Built the Genie e-commerce website for buying and selling new and used products, including buyer–seller chat (Angular 8/9, Bootstrap).
- Implemented API integration and image/document uploads, and resolved UI issues with the QA team.

UI Developer — Square Information Systems
Oct 2015 – Oct 2017

- Built the website and admin console for Pro-eLearning, an e-learning platform, using AngularJS and Bootstrap.

KEY PROJECTS

OneSphere — Multi-Tenant Enterprise ERP | Angular, NgRx, Native Federation, Node.js, .NET, PostgreSQL, Docker, AWS
End-to-end ERP covering Accounts, HRMS and Inventory. Owned architecture, tenant isolation, micro frontend setup and deployment pipeline.

AI Support Ticket Automation | Local LLM, Email, WhatsApp, Scrumban
Reads incoming client emails and WhatsApp group messages, classifies them with a local LLM, creates tickets only for real issues and confirms to the client. Ticket status changes on the Scrumban board trigger automatic closure emails to the client.

Kapil Guru — Online Learning Platform | Angular 12, SCSS, Angular Material, PrimeNG, Node.js, Express, MySQL
Trainers upload videos and documents, manage courses and batches, and run live classes; students buy and access courses through Paytm.

Vortex — Doctor Consultation App | Angular 7, Angular Material, Node.js, Express, MySQL
Private chat and video/audio consultations with doctors, health-report uploads and medicine delivery.

EDUCATION

B.Tech (Computer Science & Engineering) — Jayamukhi Institute of Technology and Sciences (JNTU Hyderabad), 2012

LANGUAGES

English, Hindi, Telugu
